

5-PAGE STARTER PDF

Start with one football idea people already care about.

Goldmine helps you turn football attention into posts, fan pages, newsletters, affiliate angles, and small digital products. AI helps you move faster, but the idea still has to be useful, specific, and safe to publish.

What this gives you

- A clear starting lane.
- Five testable football content ideas.
- One simple AI workflow.
- A 7-day plan to publish and measure signal.

How to use it

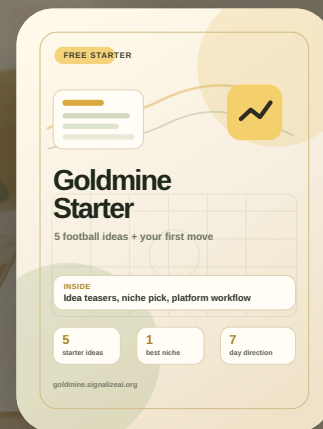

- Pick one idea only.
- Make the smallest useful post.
- Track saves, replies, shares, and profile clicks.
- Repeat only if strangers respond.

Who it is for

- Creators who want sharper football content.
- People testing fan pages, reels, newsletters, or affiliate angles.
- Anyone who wants action steps instead of generic AI advice.

What it avoids

- No fake income screenshots.
- No copied match footage strategy.
- No player endorsement tricks.
- No giant list that leaves you confused.

No fake guarantees. Just practical football-first ideas you can test this week.

START

Choose one football content lane without overthinking it.

CREATE

Turn one topic into a reel, carousel, poll, or newsletter note.

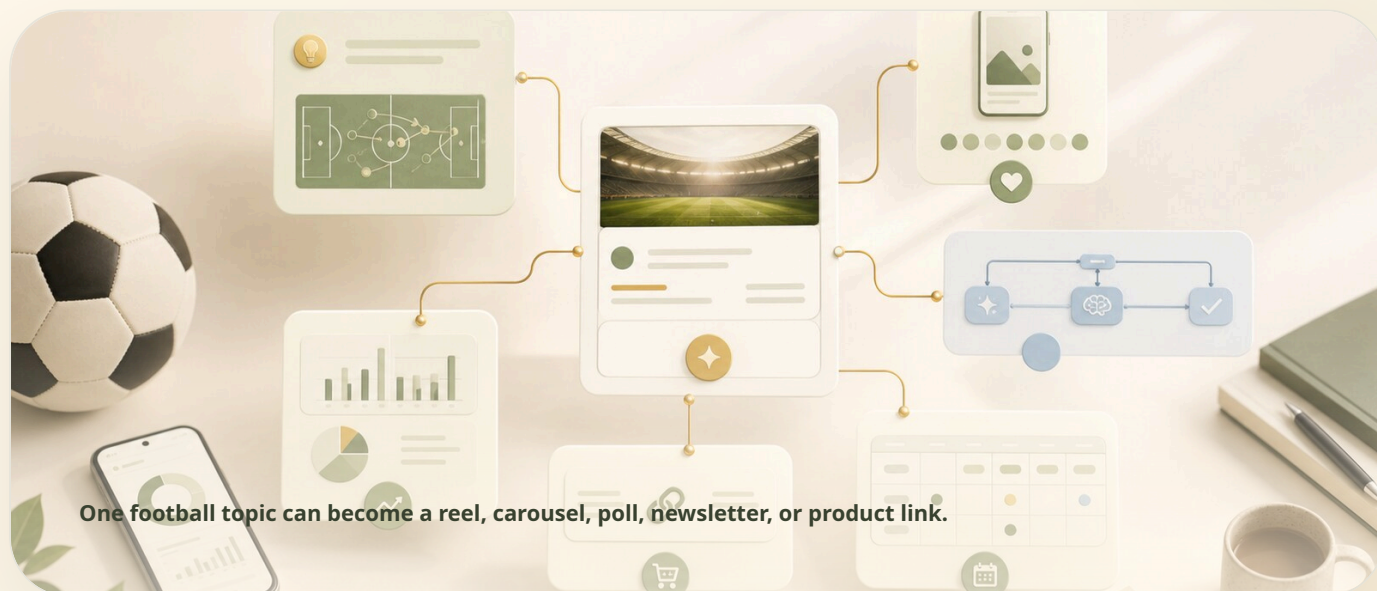

VALIDATE

Use a 7-day test before building products or automation.

PICK YOUR LANE

Your quick idea map.

Do not start by asking, "What can I post?" Start by choosing the type of fan problem you want to solve.

If you like analysis

- Use match explainers, player comparisons, and tactical breakdowns.
- Best platforms: X, Instagram carousels, YouTube Shorts, newsletters.

If you like fast trends

- Use polls, memes with context, hot takes, and daily watchlists.
- Best platforms: TikTok, Reels, X, Threads, community pages.

The first win is not money. The first win is proof that strangers care about one repeatable angle.

5 STARTER IDEAS

Pick one, not all five.

The free starter is not a giant list. It is a quick way to choose one football content lane and test it for a week.

Player debate carousel

Angle: Turn a loud debate into 5 clean slides.

Hook: The better question is not who is greater. It is who changed games faster.

First step: Pick one debate fans already argue about.

Match explainer reel

Angle: Explain one moment people saw but did not fully understand.

Hook: This goal started 18 seconds before the shot.

First step: Choose one tactic, substitution, or pressing trigger.

Fantasy watchlist post

Angle: Help fans decide who to watch before the game.

Hook: Three players casual fans are sleeping on this week.

First step: Pick one fixture or group.

Fan product roundup

Angle: Make useful buying lists around match days.

Hook: If you are hosting a watch party, start with these 5 things.

First step: Pick a fan scenario: watch party, training, travel, gifting.

AI content remix page

Angle: Use AI to turn one topic into many formats.

Hook: One football idea can become a reel, carousel, poll, and newsletter.

First step: Pick one football topic.

Choose by strength

1. Pick analysis if you enjoy explaining.
2. Pick trends if you move fast.
3. Pick product roundups if you like useful lists.

Choose by proof

1. Can you post it three times this week?
2. Can people save or share it?
3. Can it lead to a checklist, link page, or template?

Choose the one you could post for 7 days without getting bored. The best idea is usually the one you can repeat calmly, not the one that sounds the fanciest.

ONE SIMPLE AI WORKFLOW

Turn one topic into four assets.

Use this before buying tools or building automation. The goal is one useful post, then one useful remix, then one small next step.

Input

- Topic: a player debate, match question, or fan problem.
- Audience: casual fans, fantasy players, training fans, or creators.
- Format: reel, carousel, poll, or newsletter.

Prompt

Give me 5 football content angles for [topic]. For each angle, include a hook, a 30-second script, one visual idea, one caption, and one safe monetization path. Avoid copyrighted clips and fake income claims.

Example output

1. Hook: This goal started 18 seconds before the shot.
2. Short script: explain the build-up in plain English.
3. Carousel: show claim, example, takeaway, counterpoint, question.
4. CTA: Want the checklist I used for this breakdown?

Publishing checklist

1. Use your own wording.
2. Fact-check the claim.
3. Avoid copyrighted footage.
4. Track saves, replies, shares, and profile clicks.

One topic becomes four assets

1. Reel: one 35-second explanation.
2. Carousel: one 5-slide breakdown.
3. Poll: one question to collect comments.
4. Newsletter note: one paragraph with the useful takeaway.

Copy prompt to start

Create a football content pack about [topic]. Give me a hook, a short video script, a carousel outline, a poll question, a newsletter paragraph, and one soft CTA. Keep it factual and avoid income promises.

CTA examples

1. Want the checklist I used?
2. Should I make a template for this?
3. Comment a player or match and I will make a version.

If the hook feels generic, the post will feel generic. Make the angle specific before making it pretty.

7-DAY STARTER PATH

Your first test week.

Days 1 to 3

- Pick one idea lane.
- Write 10 hooks.
- Publish 3 simple posts in the same format.
- Save comments and questions.

Days 4 to 7

- Turn the best post into a second format.
- Create one useful link destination.
- Add a small CTA.
- Decide whether to repeat, refine, or stop.

The \$1 Full Pack expands this into 50 pages of ideas, workflows, hooks, and a 7-day sprint.
